

# MOTORCYCLE

## Checklist

### Is my motorcycle ready for transport?

- Are the brakes on the motorcycle in **full working condition**? Is it leaking fluid?
- Have I removed **all personal belongings**?
- Have I provided Reindeer with an **active phone number** for me or my contact at origin and destination?
- Does my vehicle have any **after-factory modifications**? If so, please alert Reindeer.
- Are all the **antennas** fully retracted or removed?
- Have I removed my **toll or EZ pass**?
- Is my fuel level at **1/8 of a tank** or less?

### Prepare for relocation

- When the carrier arrives for pick-up, a complete exterior inspection will be completed prior to loading your motorcycle. For purposes of a thorough inspection, it is helpful if your **motorcycle is clean** and clear of ice, snow or other debris.
- **Alarm systems** should be disabled before our driver's arrival on the day of loading.
- **Steering must stay unlocked** to position the motorcycle while loading.
- **Saddle bags** do not need to be removed, but must be emptied.
- Please ensure your motorcycle has the appropriate level of **coolant, transmission fluid and/or antifreeze**. Neither Reindeer nor the carrier shall be responsible for damage caused by Acts of God or nature that may change the climate conditions.

### Inspection before & after move (no exceptions)

- You or your designated representative will be asked to complete a **walk-around exterior inspection** of your motorcycle at the origin and destination. It will be necessary for our driver to obtain a signature on the inspection form.\*
- Exceptions will be noted on the bill of lading and a **signature will be required** from you or your appointed representative at both origin and destination.

*\*Please note: We deliver 7 days a week during daylight hours only to enable proper inspection of the vehicle.*

Our in-house Quality Care Team can assist with reports of damage received within 24 hours of delivery.
